What Each Feature Is Good For

Electric lift

Raises and lowers the table with a hand or foot control so you can match your working height to each client and technique. Protects your back and makes client transfers easier.

Tilt / zero gravity

PerformaLift, Palas, and Britta tilt the top. Raising the head end relieves sinus pressure face-down; tilting the other way with a salon or backrest top creates a weightless zero-gravity recline.

Low height (18.9")

Low-height models are easier for clients to sit on and transfer to, suit ADA-accessible rooms, and give shorter therapists better leverage for deep tissue.

Integrated heated top

Built-in heat in the table top keeps clients warm through the whole session — no separate table warmer pad needed.

Warming drawer

A heated drawer in the base (Prema, Talise, Britta) or trolley (Halo, Clodagh) for keeping towels and compresses warm and ready at the table.

Hot stones & oil warmers

None of these tables has a built-in stone heater. For hot-stone services, pair any table with a trolley: the built-in power strip runs a stone heater, oil warmer, or towel cabi, and storage drawers hold stones, oils, and linens.

Storage drawer / cabinet

Keeps linens, bolsters, stones, and product hidden but at hand, so the room looks clean and uncluttered.

SoVi vibroacoustic sound

Built-in speakers and transducers deliver music and healing vibration through the table — ideal for sound healing, meditation, and premium relaxation services. Requires 6" padding on tables.

ABC system

Adjustable Breast Comfort: a powered insert the therapist adjusts discreetly to relieve chest and lower-back pressure for face-down clients.

Battery backup

Keeps the lift working during a power loss so a client is never stuck mid-session. Not available with SoVi or the heated top.

LED accent lighting

Under-cabinet glow that sets a calm, high-end mood in a dim room and helps clients see the floor when getting on and off.

AeroCel padding

Thick 4" (or optional 6") replaceable foam padding on spa tables and loungers; MedSpa chairs use 3" padding. Thicker padding means more plush comfort for long sessions.

The Halo Slimline Trolley has a smaller width of 18in compared to the 25.6in width of the Halo Trolley giving the Slimline a smaller footprint. This design features customizable storage options, programmable LED under top lighting, hidden casters and power strip, unique edge design, and a pull out work shelf.

BEST FOR · Tight treatment rooms that still need organized storage. The slim 20" footprint holds clean linens, oils, lotions, and tools; the built-in power strip and hot-towel-cabinet-ready storage area let you run a towel cabi, stone heater, or oil warmer right at the table.

AMERICAN CRAFTSMANSHIP

Handcrafted in Pennsylvania, USA — built to order for you

Made in the USA

Built by Oakworks' own craftspeople at their factory in southern Pennsylvania — a family-owned American manufacturer for over 45 years. Not an imported or rebranded table.

Made to order

Nothing sits in a warehouse. Your table is built after you order it, in the upholstery, finish, and upgrades you choose.

Built in 4–6 weeks

Typical build time is 4–6 weeks. Then it ships free, direct from the Oakworks factory to your treatment room.

Chosen by the best

Oakworks tables are trusted by Fontainebleau Las Vegas, Montage Palmetto Bluff, Equinox, and PCH Hotels & Resorts.
